An advisory opinion adopted by AZBN is an interpretation of what the law requires. While an advisory opinion is not law, it is more than a recommendation. In other words, an advisory opinion is an official opinion of AZBN regarding the practice of nursing as it relates to the functions of nursing. Facility policies may restrict practice further in their setting and/or require additional expectations related to competency, validation, training, and supervision to assure the safety of their patient population and or decrease risk.

**OPINION: OB/GYN THERAPEUTIC
DIAGNOSTIC ULTRASOUNDS**

APPROVED DATE: 1/97
**REVISED DATE: 11/02, 3/03, 03/07, 09/10,
12/13, 7/14**
**ORIGINATING COMMITTEE:
SCOPE OF PRACTICE COMMITTEE**

Within the Scope of Practice of: RN LPN

ADVISORY OPINION

ULTRASOUNDS: LIMITED OBSTETRIC, GYNECOLOGIC AND REPRODUCTIVE

It is not within the scope of an RN to perform Therapeutic Ultrasounds.

It is within the scope of practice of an RN to perform and interpret limited Obstetric, Gynecologic and Reproductive ultrasound.

I. DEFINITIONS

- A. Therapeutic ultrasound - A procedure performed to promote wound healing, stimulate bone repair, and accelerate healing in tendon injuries and as thrombolytic agent.
- B. Limited diagnostic ultrasound - A procedure performed to obtain specific, limited information. In antepartum and intrapartum settings it may include identification of fetal number, fetal presentation, presence or absence of fetal cardiac activity, localization of the placenta, assessment of amniotic fluid volume, and a biophysical profile. In gynecologic or reproductive settings, limited diagnostic exams may include assessments of uterine size and position, endometrial thickness, or presence and size of ovarian follicles.

II. GENERAL REQUIREMENTS

- A. A written policy and procedure is maintained by the employer.
- B. Only RNs' who have satisfactorily completed an agency's instructional program and have had supervised clinical practice to demonstrate competency are allowed to perform limited OB/GYN diagnostic ultrasounds.
- C. Documentation of satisfactory completion of the instruction and supervised clinical practice and continued competency is on file with the employer.

III. COURSE OF INSTRUCTION to include:

- A. Anatomy and physiology related to the ultrasound-targeted system,
- B. Indications and contraindications of diagnostic ultrasound,
- C. Ultrasound physics and instrumentation,

- D. Clinical demonstration of ultrasonic imaging,
- E. Patient education,
- F. Interpretation,
- G. Understanding the implications for patient care from ultrasound findings,
- H. Nursing care responsibilities.

IV. RATIONALE

RNs' with proper education and training have the knowledge necessary to safely perform limited OB/GYN ultrasounds with minimal risk to patients.
